PERFORMANCE

Presentation training for PhDs

# Does the world need to know the results of your research?

Could you see yourself winning presentation awards when you perform your pitch? Or does the thought of public speaking make you want to curl into a tiny ball of terror?

Many people would sooner die than deliver a speech or presentation. Studies show that 40 percent of people suffer high levels of public speaking anxiety, with another 50 percent exhibiting moderate to high levels. Only a tiny proportion seek help for a condition that Columbia University says has a 10 per cent impairment on wages and 15 percent impairment on prospects.

The University of Queensland says an 80,000 word thesis would take nine hours to deliver. Its world-renowned speaking competition requires participants to present and perform their research in just three minutes.

Even if you can speak in public communicating your complex research results clearly and succinctly, and as a powerful presentation that has your audience leaning in, is difficult to do.

Chuhao Liu delivers his award-winning Cooperative Research Centres Association address after our *PowerPitch* training for the Railway Manufacturing CRC followed by our *PowerPitch Performance*.

## PowerPitch Performance PLUS

- Pre script consultation (90 minutes)
- Structural edit and video recommendations
- Presentation skills coaching
- Skype rehearsals and performance reviews

**Price \$575 + gst per person**

Talk to us about how *PowerPitch Performance* can prepare you for compelling presentations.

## What others say

I saw the winner's presentation at the CRCA Early-Career Showcase. He was fantastic. If you can help someone turn railway ballast into something so interesting and entertaining, you must be doing something right.

*Adam Barclay, CRC for Contamination Assessment and Remediation of the Environment*

It was a real pleasure working with you and Roger. I particularly benefited from the time you both took to sit down with me and talk through my research, which helped me understand how you were reframing the presentation of the work for people outside of the discipline. The time and effort you both went to was a great aid for me in really stretching outside of my boundaries and putting myself through something quite different to what I normally engaged in *Thomas Bede Payton PhD CRCORÉ*

*'We won! Thanks for your support and encouragement. Without your help, I could hardly have achieved this award!'* Chuhao Liu
